

Hello! My name is Siobhán Mooney and I am a student in university of Galway.

Come Join My Study!

An Interview Study on the views of Adolescents with Autism Spectrum Disorder on their communication needs in their everyday lives.

We know that communication is a key aspect in daily life for everybody. We want to gather a greater understanding of how Adolescents with ASD communicate. We wish to give you a chance to talk about your experiences communicating with others. We want to give you a voice!

Some Questions I will ask you:

What does the word “communication” mean to you?

Tell me about a good experience you had when talking?

Do you feel like everyone understands you?

You can take part in this study if you are:

- Adolescents aged between 13 and 17.
- Adolescents who are in secondary school in Ireland.
- Adolescents with ASD.

Unfortunately, you cannot take part in this study if you are:

- Adolescents living outside of Ireland.

Feel free to share your thoughts and opinions through interviews lasting around 45 minutes via Zoom!

INTERESTED?
